

LAHCINE FARAH

Full-Stack Developer (React · Django · Python) | Salesforce & Odoo Developer | Master 1 Software Engineering Student

lahcinefarah2004@gmail.com | Tlemcen, Algeria (Remote) | github.com/FARAH317 | French (native) | English (B2 – Professional working proficiency)

PROFESSIONAL SUMMARY

Full-stack developer and Master 1 Software Engineering student with hands-on production experience across React, Django REST Framework, PostgreSQL and MongoDB, plus enterprise CRM/ERP development in Salesforce (Apex, LWC, SOQL, Flows) and Odoo. Has independently built and deployed several complete full-stack applications end-to-end — REST API design, database modeling, authentication/role-based access, and responsive frontends — including a national cancer-registry platform in production use. Comfortable picking up new stacks quickly (MERN, Flask, TypeScript) and working autonomously in remote, async teams. Seeking a remote internship (1–3 months) as a Full-Stack, React, or Python Developer.

TECHNICAL SKILLS

Frontend	React.js, JavaScript, TypeScript, Tailwind CSS, HTML/CSS, responsive UI
Backend	Python, Django, Django REST Framework, Flask, Node.js, REST APIs, authentication & security
Databases	PostgreSQL, MySQL, MongoDB, PL/SQL, SOQL
Salesforce	Apex, SOQL, Lightning Web Components (LWC), Flows, Triggers, Custom Objects
Odoo	Python modules, XML/QWeb, custom views, workflows, data models, Odoo Studio
Tools & DevOps	Git, GitHub, Vercel, Render, VS Code, Jira, Salesforce Developer Console
Soft Skills	Customer-facing communication, team collaboration, problem-solving, analytical thinking

PROFESSIONAL EXPERIENCE

IT Intern – Computer Science Department, Centre Hospitalier Universitaire (CHU), Tlemcen

March 2025 · 2 weeks

- Analyzed hospital information systems and medical data flows to identify improvement opportunities, reducing manual data-entry time by an estimated 20%.
- Participated in the management and maintenance of the department's computer hardware, ensuring 100% uptime during the internship.
- Researched health-information-system security best practices and documented 5 vulnerability risks in the existing infrastructure.
- Gained exposure to patient-data management workflows relevant to CRM and ERP system integration.

PROJECTS (FULL-STACK)

National Cancer Registry Platform (RNC) — React · Django REST Framework · PostgreSQL · Vercel · Render ·

github.com/FARAH317/RNC-Registre-Nationale-De-Cancer

- Built and deployed a production full-stack platform for epidemiological tracking of cancer cases across the Tlemcen region, used by healthcare professionals.
- Designed a secure REST API (Django REST Framework) with role-based access control for 4 user types, plus statistical dashboards and report exports.
- Shipped a companion RCP (multidisciplinary meeting) module: live meeting rooms, an AI oncology assistant (Groq LLaMA API), collegial voting, and auto-generated PDF meeting reports.
- Debugged and resolved production issues independently: CORS misconfiguration, Vercel SPA routing 404s, and QR-code patient-lookup access.

Hotel Reservation System — *React · Django · PostgreSQL* · github.com/FARAH317/hotel-reservation-system

- Developed a full reservation app covering room management, availability tracking and payment processing.
- Built a responsive client booking interface and an admin back-office dashboard managing 50+ room types.

Clinic Management System — *Flask · Python · HTML* · github.com/FARAH317/clinic-management-system

- Developed a full clinic management platform covering doctors, medicines, appointments and patient records.
- Built an admin dashboard for staff to manage doctors, track medicine inventory and monitor daily appointments, plus a patient-facing online booking page.

DevAssistant – AI-Powered Developer Assistant — *MongoDB · TypeScript · LLM Integration · REST API (Flask)* · github.com/FARAH317/devassist-ai

- Built an AI assistant that helps developers debug code, analyze logic errors and get automated fix suggestions.
- Integrated an LLM backend for contextual debugging explanations and code analysis across multiple languages, exposed through a Flask REST API.

E-Learning Platform (Palefrenier) — *React · Django · PostgreSQL · TypeScript* · github.com/FARAH317/LearnCodeWebsite

- Created an online programming-learning platform with courses, quizzes and progress tracking.
- Implemented authentication, content management and progress tracking across 10+ interactive courses.

Mini Python Compiler — *Python · Compiler design* · github.com/FARAH317/compileur-minipython

- Built a mini compiler for a Python subset (lexer, parser, semantic checks) as an academic project — demonstrates core CS/language-processing fundamentals.

PROJECTS (ENTERPRISE CRM / ERP)

Medical Management CRM — *Salesforce · Apex · LWC · SOQL · Flows · Custom Objects*

- Customized a Salesforce CRM for patient and medical-consultation management, handling 200+ simulated patient records.
- Developed Apex triggers, automated Flows and custom Lightning Web Components, reducing manual data entry by ~30%.
- Designed dashboards and reports for medical-record tracking, enabling real-time visibility across 5 custom objects.

Agency Management & Education Module — *Odoo · Python · XML/QWeb · Odoo Studio*

- Built Odoo modules for agency management (clients, contracts, invoicing) covering the full business lifecycle.
- Developed an education module managing students, courses, grades and schedules for 3 academic departments.
- Customized views, workflows and PDF reports with QWeb, improving report generation speed by 40%.

EDUCATION

Master 1 – State Engineer in Computer Science, Software Engineering

Université Abou Bakr Belkaïd, Tlemcen · 09/2022 – Present (Bachelor equivalent completed)

- Software engineering, software architecture, advanced databases.
- Web & mobile development, information systems, computer security.
- Currently scoping a Master's thesis (PFE) applying machine learning to a real-world prediction problem (candidate topics: electricity-fraud detection, wildfire-risk prediction, or student-dropout prediction).

ADDITIONAL INFORMATION

- Availability: Immediate – remote internship, 1 to 3 months, 100% remote.
- Interests: full-stack web development, ERP/CRM development, applied machine learning, open-source, business-process automation.
